(54) Title: A METHOD, AN INSTALLATION, AND A COMPUTER PROGRAM FOR ESTIMATING THE INITIAL SIZE OF A POPULATION OF NUCLEIC ACIDS, IN PARTICULAR BY PCR

(57) Abstract: In order to estimate the size of an initial population of nucleic acids in a sample of interests, in particular by PCR, the following steps are performed: (a) providing a model of the effectiveness of the PCR, the model comprising a constant stage followed by a non-constant stage, the stages being united by a changeover region having a changeover index; (b) using the model of effectiveness to express a relationship between the changeover index and a parameter representative of the initial population size; and (c) determining the changeover index by comparison with the experimental measurements, and deducing therefrom the initial population size in the sample of interest.

**A. CLASSIFICATION OF SUBJECT MATTER**

G06F19/00 C12Q1/68

According to International Patent Classification (IPC) or to both national classification and IPC

**B. FIELDS SEARCHED**

Minimum documentation searched (classification system followed by classification symbols)

G06F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the International search (name of data base and, where practical, search terms used)

EPO-Internal, BIOSIS, EMBASE

\* Special categories of cited documents:

\*A\* document defining the general state of the art which is not considered to be of particular relevance

\*E\* earlier document but published on or after the international filing date

\*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

\*O\* document referring to an oral disclosure, use, exhibition or other means

\*P\* document published prior to the international filing date but later than the priority date claimed

\*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

\*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

\*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

\*G\* document member of the same patent family
